New Calflora Tools for CNPS Users

April 12 (Thursday) 7pm at the Ukiah Garden Club House
Join Calflora’s new Executive Director Cynthia Powell to discuss new Calflora tools for CNPS Calflora users. Calflora’s plant database hosts over 2 million plant occurrences, some of which come directly from Sanhedrin CNPS members. Cynthia will go over Calflora’s new planting guide, population monitoring tools, Great Places, email alerts, and speak more generally about the uses of Calflora for CNPS chapters. She would also like to know how Calflora can better serve the Sanhedrin CNPS Chapter and to answer any of your questions.

April 13 (Friday) 8:30am at Low Gap Park in Ukiah
Talk attendees are invited to join Calflora and Emily Allen for a rigorous and hands-on plant data collecting 3-mile hike through Low Gap Park in Ukiah. The park has a wide variety of species to see including many wildflowers and this is a great opportunity to try out the Calflora app and website. Good hiking shoes are needed and some walkers may want to bring walking sticks as well. Dress for the weather. Meet at the corner of the park by the tennis courts.

For more information on the talk or hike please contact Emily Allen at eallen624@gmail.com or 805-450-6979.

Here are two blooming plants that we may find on the hike. Photos taken in Low Gap Park by Emily Allen

Shooting stars (Primula hendersonii) in an oak woodland

Baby blue eyes (Nemophila menziesii)
